

Sana Engineering College

Department of Computer Science and Engineering

A Report One-Day Workshop on “**Information Security**” conducted during 7th March, 2015. This workshop was organized by the Department of Computer Science & Engineering with association of Computer Society of India for the student audiences of B.Tech CSE. All the students of II and III B.Tech CSE took active participation in the workshop. The resource person of this workshop was **Mr.K.Srujan Raju**, the Secretary COMPUTER SOCIETY OF INDIA , Hyderabad Chapter, .

The objectives of workshop were

- To continually strengthen and improve the overall capabilities of the information security management system
- To increase professional skills in terms of information security management and technology.
- Explore cyber security research ethics techniques, tools, standards and practices so researchers can apply ethical principles within their research methodologies.
- Explore ethical frameworks and how they are applied across the various stakeholders and respective communities who are involved;
- To establish quantified information security goals annually through management and review meetings

The workshop started off with an introduction to Information Security. The session continued with the basic platform level topics & other complex concepts like Security attacks, web security requirement. The speakers have also discussed security techniques used for Network security. Individual attention was given to the students to help them learn better.

The last session of the workshop was a revision session of the topics discussed in the earlier sessions and clarification of doubts of the students. As per the narrations of students the workshop was the best ever platform focusing practical approach in Information Security.
