

EEE INDUSTRIAL VISIT-KTPS

To enhance the students knowledge in the area of power generation practically, our management and principal has supported the students of EEE department for an “Industrial Visit to KTPS”, KOTHAGUEDEM.

We started our journey by two college buses at morning 7:00 AM with 103 students and six faculty members from Kodad. We had our journey with a lot of fun.

Our bus has stopped at Kinnerasani reservoir at 11:30 AM. We entered into that area and had lot of fun enjoyment and some photo-shoots. At last we reached our destination at 2:17 PM with a lot of enthusiasm and eagerness and we stepped in to the power plant at 3:14 PM. We were guided by an A.E of BM-3 Mr.K.Vijay kumar.He explained and leaded us to the various sections like coal handling plant, Ash handling plant, Pulerisation part , super-heater,Boiler,Turbine-Generator set , chimneys and at last a huge cooling towers. The cooling tower has a specialty that at its entrance it is very cool, as we were moving in it is very hotand at its center it is so cool. Inside the plant we were followed by two security guards every where.

After all we gratitude K.Vijay Kumar with sweets,college diary and some remuneration and had a photo-shoot with him.We stepped out of the plant with a lot of practical knowledge and enjoyment. We had a last vision at the gates of KTPS at 6:12 PM and waved our hands with a huge smiles on our faces and happiness in our hearts.....
